

CONVEYOR AUTOMATION SOFTWARE

CONFIGURABLE

Fully Configurable Software. VSI team of experts will work to automate the line per your unique specifications.

SCALABLE

Modular automation approach works for small lines or large lines with several features. All "stations" report back to a centralized server for enterprise-level reporting.

PROVEN

Large, proven implementations. Product has continued to advance since initial implementation in 2017.

Status	Name	Line	Image	Display Index	Launch on Startup	Enable Verification	Runs	Application	Arguments	Description
●	Lane A Metal Detector	Line 1		1	No	Yes	1	Metal Detector v1.0	12	Lane A Metal Detector
●	Lane B Metal Detector	Line 1		2	No	Yes	1	Metal Detector v1.0	12	Lane B Metal Detector
●	Lane A Product WPLS	Line 1		3	No	Yes	1	Product Weigh Price Labeling System v1.0	21	Lane A Product WPLS
●	Lane B Product WPLS	Line 1		4	No	Yes	1	Product Weigh Price Labeling System v1.0	21	Lane B Product WPLS
●	Case WPLS	Line 1		5	No	Yes	1	Case Weigh Price Labeling System v1.0	28	Case WPLS
●	Palletization	Line 1		6	No	No	1	Palletization v1.0	12	Palletization
●	Sadler Emergency Stop Station	Line 1		7	No	No	1	EStop v1.0	1	Sadler Emergency Stop Station

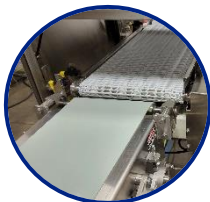

Vertical Systems, along with our hardware partners, has become an industry leader in delivering powerful Automated Conveying Solutions.

Our **Conveyor Automation Software** enables modular stations to be built and managed individually while maintaining traceability through the full operational workflow. By separating specific automation logic into multiple event-driven managed applications, the software can be scaled to optimize performance and throughput.
